

DataGuard® Armoured Network Cables

Plastic wrap for all round protection

DataGuard® wrap is an innovative product designed to guarantee a total and high quality protection for all cables sold on drums and reels.

DataGuard® wrap is a plastic sheet made thanks to a special production process to obtain two different surfaces:

- The inner surface is smooth and perfectly adheres even to rounded surfaces, protecting them with the maximum efficiency.
- The outer surface is specially corrugated in order to reduce friction with other materials, but above all is capable of withstanding violent impacts, heavy weights, shocks or compressions without any problem.

DataGuard® wrap is up to 8 times faster than using wooden lagging, arriving on site ready to be used within minutes.

DataGuard® wrap is 100% recyclable and is manufactured partly with recycled materials.

Characteristics

- 100% recyclable
- Anti-UV treatment
- Flexible in all directions
- Very resistant to shocks
- Resistant to compression
- Waterproof
- Oil-repellent
- Weatherproof
- Easy to apply
- Safe
- Light

Certifications And Regulations

DataGuard® wrap is certified according to Hamburg BFSV standard for cable protection.
